PRACTICE GUIDE for “SH” SOUND

Welcome

Thank you for using Speech Buddies practice guides! You will find them extremely helpful for all types of students: in the clinic, school, or at home. This lesson plan is designed to reflect a traditional “hierarchy” of practice that is rooted in decades of research and is the professional standard for lesson plans in speech therapy.

- There are 32 exercises overall
- Practice 4 times per week for 8 weeks.
- Try to maintain a consistent schedule for your student or child.

How are the Lessons Arranged?

The lessons start simple and gradually, and as the student you're working with gets more accurate in producing the challenge sound(s), become more complex and demanding. Each lesson targets one of the following: isolation and syllables, words, words in sentences, and conversation. At the beginning of your practice, your student will attempt to say the sound in isolation (e.g. “ssss”) or in syllables, and will rely very heavily on the Speech Buddies Tools to produce the sound correctly. As he gets more accurate, exercises become more challenging by focusing on whole words. Once the student is judged to be roughly 80% accurate in conversation, that sound would be considered “treated.”

How do I follow each Lesson?

For each item within a given lesson:

1. Follow the instructions about whether to use the Speech Buddies Tool for that item. As your student progresses through the lessons and gets more accurate in his productions, the Speech Buddies Tool can be used less and less, but this is reflected in how the lessons are structured.
2. Have your student repeat the sound or word after you.
3. Once your student has attempted to say the sound, simply record whether that item was, in your judgment, correct or incorrect.
4. Continue through each lesson until all 40 items have been completed, using the extra space at the bottom of the lesson page for notes.

No skipping ahead!

It is important that you do not skip any lessons. Even if your student seems to be breezing through lessons, this extra practice will undoubtedly help him with the final phase of therapy: mastering the sound(s) in conversation. On the other hand, if you feel your student needs extra time at a specific level, you may repeat a lesson or two at a given level (e.g. isolation and syllables, words) before progressing. However, it is recommended that you stick to the lesson sequence as much as possible.

Good luck and thank you for your interest in Speech Buddies!

Sincerely,

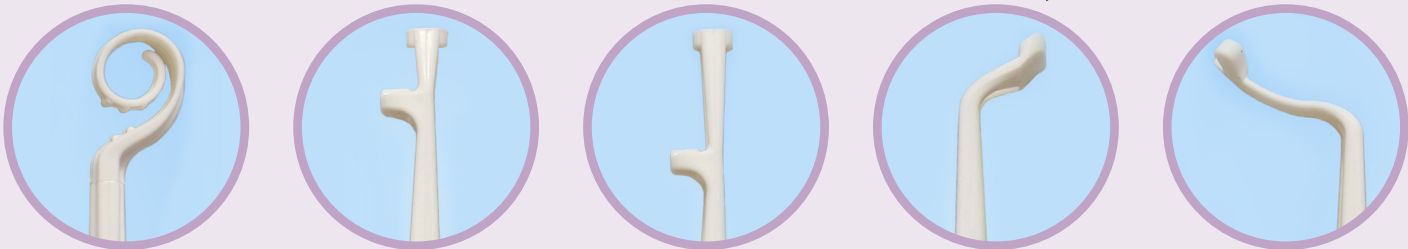

Gordy Rogers, M.S. CCC-SLP
Speech-Language Pathologist

A Quick Introduction to Speech Buddy Tools

Shark Buddy is an excellent complement to this lesson plan, but is not a requirement.

Tongue targets you can feel

Bendable tips

R SOUND **S SOUND** **SH SOUND** **L SOUND** **CH SOUND**

Speech Buddies Placement Tools are easy to use. They train the tongue to make the correct shape by providing targets that you can feel. Getting started is simple:

- Choose the right tools for your child
- practice for 10 minutes 3 times a week
- and see results.

WITH A LITTLE GUIDANCE, KIDS 5 AND UP CAN EVEN USE THEM ON THEIR OWN!

CHOOSE
The perfect tool for your child

PRACTICE
10 minutes, 3 times a week

RESULT
In 30 days or less

SHARK BUDDY FOR THE SH SOUND

The Shark Buddy teaches proper tongue placement to make the perfect SH sound. It helps with words like Show, sunshine, and wash. A child can learn to make the sound by training the tongue to hit the target. This fixes a "lisp" or "slushy" sound.
